

Air Filtration and Extraction Equipment

Service & LEV Testing

Cleaner, safer, more
productive workshops

SERVICE

SPARES

LEV TESTING

AIR
MONITORING

- ✔ SPA qualified engineers
- ✔ UK wide coverage

Protecting people since 1969

Ensure Peak Performance

All industrial air filtration and extraction equipment performs best with regular preventative maintenance

In the same way that an annual service ensures vehicles run efficiently, replacing consumable components and keeping equipment clean offers benefits including:

- ✔ Increased efficiency
- ✔ Less production downtime
- ✔ Reduced costs

We don't just service Filtermist units...

...we service **all makes & models** of oil mist, dust, smoke and fume extraction equipment

Filtermist provides regular service plans freeing you up to concentrate on your business

Emergency call out service available

Red lights? It's time to call our Service Team

Digital service reports

Filtermist engineers log all details of their visit using a digital tablet. Risk assessments, method statements, and service sheets can be in your inbox before our engineer has even arrived at his next job.

- ✔ Less paperwork
- ✔ Easy to file and find when needed

If you can't find the it's not Filtermist

Filtermist engineers only use genuine parts approved by us. Our dedicated Service Division arranges delivery of Filtermist spares kits prior to all engineer visits so every job can be completed as scheduled.

F Monitor

Not sure if your Filtermist is performing properly?

F Monitor uses coloured warning lights to advise machine operators when a unit needs servicing, or if any of the filters are blocked. We recommend servicing Filtermist units every 2000 hours they are in use.

If you want the security of knowing when your extraction equipment needs servicing, Filtermist can retrofit F Monitors and Pressure Gauges to monitor air flow and pressure – eliminating guesswork.

Every
14
months

Regular LEV Testing is a legal requirement

Faulty LEV systems can be deadly

COSHH regulations require most LEV systems to be tested **every 14 months** by a competent person, and tests and reports must conform to HSE standards.

Protect your workers and your business by ensuring your LEV systems adhere to HSG258 guidelines with regular testing. Whatever make or model of LEV system you use, we've got it covered.

Filtermist also supplies:

- ⊕ Air flow indicators
- ⊕ Smoke sticks
- ⊕ LEV log books

Why take the risk?

Stay COSHH compliant with regular LEV testing by qualified Filtermist engineers.

Why Filtermist?

Filtermist has manufactured oil mist filters since 1969 and is trusted by many of the World's leading manufacturers to keep the air in their workshops clean. We know manufacturing. We know LEV systems. We know how to protect people from harmful airborne contaminants by maintaining cleaner, safer, more productive workshops.

Service to suit you

We understand that all businesses operate differently. If you want the security of knowing that COSHH compliance is one less thing for you to think about we can take care of that, or if you'd rather contact us when you need our services, that's fine too – planned or ad hoc, it's entirely up to you.

Filtermist has a team of qualified engineers who undertake regular training to ensure they're up to date with the latest HSE requirements.

Our engineers cover the whole of the UK. So whether you're based in Land's End or John O'Groats – we're at your service.
